

Careful Thinking

Time to think ... and share ideas

In a small group — Discuss when reasoning is useful, for example:

“Who needs to reason for their work?”

“What games require reasoning?”

“When do adults need to reason in everyday life?”

“When do we need to reason in school?”

“When did you last have to reason anything out?”

A way with words

Try to explain what reasoning involves ...

Me-now!

How much do I exercise my reasoning muscles? **Pick out one**

Lots ☐ Variable ☐ Not much ☐ Almost never ☐

When do you do it and when do you avoid it and why?

Who do I know who is good at reasoning that I could learn from?

What might I say to myself that would make me better at reasoning?
