

How We Notice

Time to think ... and share ideas

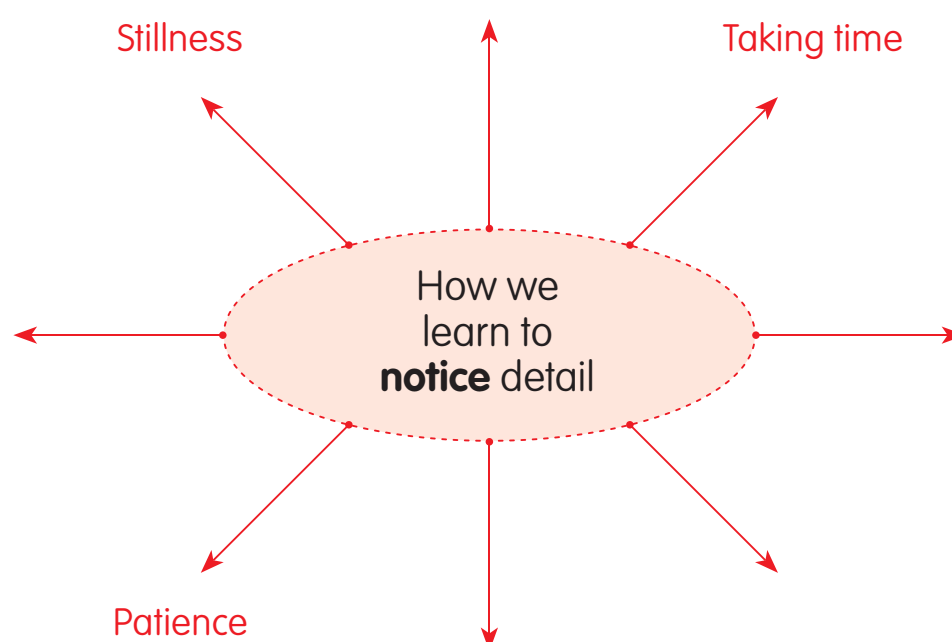

What do experts notice? – A painter will notice subtle differences in colour, shape or texture. What about other experts ... gardeners, doctors, musicians, drivers, sports-people, actors, cooks, mechanics?

Choose a couple of experts from the list or from your own ideas and think about what they notice and how they might have learned this.

A way with words

Collect words that tell you how people learn to notice detail

Me-now!

Rate yourself for noticing detail in different subjects and activities.

I really can't be bothered with detail in these situations ...

I notice detail and subtlety in ...

this is because ...

It would help me to be more aware of detail in these areas of my life ...
