

Does my classroom culture encourage planning?

My students create their own plans

My students begin and act with the end in mind

My students pursue and execute their own, well organised plans

We talk about what we could do / might do / should do

I encourage students to talk through what they intend to do

We discuss how to set goals and create achievable plans

I encourage students to use the routine 'what will it look like when it is finished?'

I build in 'Think Pair Share' to slow things down before planning what to do

I build in time to enable students to review the effectiveness of their plans

Display illustrates a range of planning skills

Successful plans are displayed, unsuccessful ones are learning opportunities

Display illustrates the difference between goals and plans

This is a consistent feature in my classroom

This is an occasional feature in my classroom

This is rarely evident in my classroom

This is something I would like to work on
